

Additive Manufacturing

With our 3D Printing technology, Advant Medical has the ability to support pilot manufacturing along with low and high volume production quantities.

Our lean approach ensures DFM resulting in competitive costs and lead time.

Accelerate your new product design with our 3D Printing services

Advant Medical provides high precision rapid prototyping services using our Connex 350 3D Printing technology. Both simple and complex design samples can be provided in high resolution layers down to 16 microns allowing smoother surfaces and thin walls. The build area is 340mm x 34mm x 200mm with an accuracy of between 0.1mm and 0.25mm.
